30	Off-balance sheet items		47736.26	0.00	0.00	2247.30
31	Total RSF (14+15+16+24+30)					191181.71
32	Net Stable Funding Ratio (%)					128.63%

* Items reported in the 'no maturity' time bucket do not have a stated maturity. These includes, but are not limited to, items such as capital with perpetual maturity, non-maturity deposits, short positions, open maturity positions and non-HQLA equities.

Qualitative disclosures around NSFR:

Guidelines on NSFR has become effective from 01.10.2021. Accordingly, bank has published its first disclosure regarding NSFR for quarter end 31.12.2021.

The objective of NSFR is to ensure that bank maintains a stable funding profile in relation to the composition of its assets and off-balance sheet activities. A sustainable funding structure is intended to reduce the probability of erosion of a bank's liquidity position due to disruptions in a bank's regular sources of funding that would increase the risk of its failure and potentially lead to broader systemic stress. The NSFR limits overreliance on short-term wholesale funding, encourages better assessment of funding risk across all on- and off-balance sheet items, and promotes funding stability.

The NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. "Available stable funding" (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of stable funding required ("Required stable funding") (RSF) of Bank is a function of the liquidity characteristics and residual maturities of the various assets held by Bank as well as those of its off-balance sheet (OBS) exposures.

Main drivers of NSFR:

The Bank as on 30th September 2025, had maintained ASF of Rs.245912.20 Crore. ASF consists of 61.06% from stable & less stable non-maturity deposits and term deposits with residual maturity of less than one year provided by retail and small business customers.

RSF consists of 39.30% from “Other unencumbered performing loans with risk weights greater than 35% under the Standardized Approach and residual maturities of one year or more, excluding loans to financial institutions” line item.

NSFR for the quarter ended 30th September 2025 is 128.63%, above RBI prescribed minimum requirement of 100%.

NSFR has decreased from 133.62% as of 30.06.2025 to 128.63% as of 30.09.2025 primarily due to a higher relative increase in non-maturity deposits compared to the growth in term deposits.
