

Liquidity Coverage Ratio Disclosure template					
Amount in Rs crore		Year March 2026		Year March 2025	
		Total Unweighted Value (average)	Total Weighted Value (average)	Total Unweighted Value (average)	Total Weighted Value (average)
High quality Liquid assets					
1	Total High Quality Liquid Assets (HQLAs)		81545.15		67788.07
Cash outflows					
2	Retail deposits and deposits from small business customers, of which:	172232.76	16348.58	162200.12	13927.87
(i)	Stable deposits	17493.83	874.69	45842.75	2292.14
(ii)	Less stable deposits	154738.93	15473.89	116357.36	11635.74
3	Unsecured wholesale funding, of which:	118009.43	53410.48	95334.55	44099.59
(i)	Operational deposits (all counterparties)	0.00	0.00	0	0
(ii)	Non-operational deposits (all counterparties)	118009.43	53410.48	95334.55	44099.59
(iii)	Unsecured debt	0.00	0.00	0	0
4	Secured wholesale funding	3131.85	0.00	1367.92	0
5	Additional requirements, of which:	56129.09	16367.81	38606.28	6459.16
(i)	<i>Outflows related to derivative exposures and other collateral requirements</i>	12604.72	12604.72	471.29	471.29
(ii)	<i>Outflows related to loss of funding on debt products</i>	0.00	0	0.00	0
(iii)	<i>Credit and liquidity products</i>	43524.37	3763.09	38134.99	5987.87
6	Other contractual funding obligations	2589.33	2589.33	1259.58	1259.58
7	Other contingent funding obligations	17141.79	567.74	14751.53	502.62
8	Total Cash Outflows		89283.95		66248.83
Cash inflows					
9	Secured lending (e.g. reverse repos)	828.54	0	1906.02	0
10	Inflows from fully performing exposures	11144.99	7526.61	8184.61	5204.46
11	Other cash inflows	13209.24	12934.27	1608.34	1386.01
12	Total Cash Inflows		20460.88		6590.47
21	Total HQLA		81545.15		67788.07
22	Total Net Cash Outflows		68823.07		59658.35
23	Liquidity Coverage Ratio (%)		118.49%		113.63%

1. Quantitative Disclosures for Liquidity Coverage ratio for FY end 31.03.2026:

Data is presented as simple averages of daily observations over the previous Year (i.e. the average is calculated over a period of 1 year). The simple average is calculated on daily observations over the previous year. The un-weighted value of inflows and outflows are calculated as the outstanding balances of various categories or types of liabilities, off balance sheet items or contractual receivables. The weighted value of HQLA are calculated as the value after factor multipliers are applied. The weighted value for inflows and outflows are calculated as the value after the inflow and outflow rates are applied. Total HQLA and total net cash outflows are disclosed as the adjusted value, where the adjusted value of HQLA is the value of total HQLA after the application of both factor multipliers and any applicable caps on Level 2B and Level 2 assets as indicated in this Framework. The adjusted value of net cash outflows is calculated after the cap on inflows is applied, if applicable.

2. Qualitative Disclosure around LCR

From 01st January 2015, the bank has implemented guidelines on Liquidity Coverage Ratio (LCR) of the RBI.

The Liquidity Coverage Ratio (LCR) aims to ensure that a bank has an adequate stock of unencumbered High-Quality Liquid Assets (HQLA) that can be converted into cash easily and immediately to meet its liquidity needs for a 30-calendar day liquidity stress scenario.

The LCR is calculated by dividing the amount of High-Quality Liquid Unencumbered Assets (HQLA) by the estimated net cash outflows over a stressed 30 calendar day period.

The net cash outflows are calculated by applying RBI prescribed outflow factors to the various categories of liabilities (deposits, unsecured and secured wholesale borrowings), as well as to undrawn commitments and derivative-related exposures, netted by inflows from assets maturing within 30 days. Average LCR on a daily basis for the quarter ended 31st March 2026 is 114.95%, and yearly average LCR is 118.49% above RBI prescribed minimum requirement of 100%.

(a) Main drivers of LCR:

The Bank on a consolidated basis, during the three months ended 31st March 2026, had maintained average HQLA (after Factor Multiplier-percentage) of Rs. 81545.15 Cr. HQLA is largely driven by government securities held in excess of the minimum SLR, government securities within the mandatory SLR requirement to the extent permitted by the RBI under the MSF and LCR liquidity facilities. In addition, cash balances and excess CRR maintained with the RBI are key contributors to Level 1 HQLA. Level 2 HQLAs primarily consisted of BBB- and above rated corporate bonds and commercial papers not issued by financial entities.

(b) Changes over time:

LCR has increased from 113.63% for year end March 2025 to 118.49% for year end March 2026 mainly due to more increase in HQLA as compared to increase in net cash-outflow. HQLAs have increased primarily due to higher holdings of government securities in excess of the minimum SLR requirement, as well as higher statutory reserve ratios (SLR/CRR) resulting from an increase in NDTL.

(c) Composition of HQLAs:

- HQLAs consists of following components:

(in Cr)

	Unweighted value	Weighted value
Level 1 assets	80975.13	80975.13
Level 2 A assets	669.72	569.26
Level 2 B assets	1.52	0.76

- Level 2 assets which are lower in quality as compared to Level 1 assets, constitute 0.70% of total stock of HQLA against maximum mandated level of 40%.

(d) Concentration of funding sources:

A significant counterparty is defined as a single counterparty or group of connected or affiliated counterparties accounting in aggregate for more than 1% of the bank's total liabilities.

As on 31.03.2026, there are 2 significant counterparty deposit with sum of Rs. 19827.83 Crs i.e. 4.57% of total liabilities.

There is only 1 significant borrowing as on 31.03.2026 with an amount of Rs. 13,001.67 Crs i.e. 2.99% of total liabilities.

Top 20 depositors of the Bank constitute 15.22% of our total deposits and Top 10 borrowings of the bank constitute 67.71% of total borrowings.

A significant instrument/product is defined as a single instrument/ product of group of similar instruments/products which in aggregate amount to more than 1% of the bank's total liabilities. Example of funding instruments/products- wholesale deposits, certificate of deposits, long term bonds etc. Significant instrument/product as of 31st March 2026 were bulk deposits i.e. 11.61% of total liabilities, Retail term deposits i.e. 26.51% of total liabilities, Demand deposits i.e. 42.46% of total liabilities.

(e) Derivative exposures and potential collateral calls:

Derivative exposure is shown as Net Derivative cash inflows and outflows within 30 days. Inflows and Outflows from derivative exposure arose due to maturing forwards.

(f) Currency mismatch in the LCR;

As per the RBI guidelines while the LCR standard is required to be met on one single currency, in order to better capture potential currency mismatch the LCR in each currency needs to be monitored. Accordingly, Bank is maintaining LCR on daily basis in INR and the same is compared against the regulatory requirement. Further bank does not have exposure to any other significant currencies*, hence LCR is prepared for INR currency.

(*A significant currency is one where aggregate liabilities denominated in the currency amount to 5% or more of the bank's total liabilities).

(g) A description of the degree of centralization of liquidity management and interaction between the group's units:

The liquidity management for the bank on enterprise-wide basis is the responsibility of the Board of Directors. Board of Directors has delegated its responsibilities to a Committee of the Board called as the "Risk Management Committee of Board". The committee is responsible for overseeing the inter linkages between different types of risk and its impact on liquidity. Bank has Asset Liability & Market Risk Management policy which provides the broad guidelines under which all the entities within the group operate in terms of liquidity and interest rate risk.

LCR is computed and monitored on daily basis by the Bank and the same is shared with Treasury/Midoffice for liquidity management and discussed in Investment committee.

Further LCR for the latest month along with comparison of previous months is placed before ALCO on monthly basis. Moreover, LCR position along with other liquidity parameters is placed before RMC/Board on quarterly basis.

(h) The inflows and outflows in the LCR calculation that are not captured in the LCR common template but which the institution considers to be relevant for its liquidity profile are as under:

Details of average Outflows arising from contingent liabilities for year-end 31.03.2026 are as under:

(Amount in Cr)		
Particulars	Unweighted value	Weighted value
Currently undrawn committed credit and liquidity facilities provided to	43524.37	3763.09
Retail and small business clients	29642.26	1482.11
non-financial corporates, sovereigns and central banks, multilateral development banks, and PSEs – Credit facilities	11413.81	1141.38
non-financial corporates, sovereigns and central banks, multilateral development banks, and PSEs – Liquidity facilities	0.00	0.00
banks	627.51	251.00
other financial institutions (including securities firms, insurance companies) – Credit facilities	1586.99	634.80
other financial institutions (including securities firms, insurance companies) – Liquidity facilities	0.00	0.00
other legal entity customers	253.79	253.79
Other contingent funding liabilities	17141.79	567.74
Guarantees, Letters of credit and Trade Finance	14467.47	434.02
Revocable credit and liquidity facilities	1319.23	65.96
Any other	1355.09	67.75
